The CARNAL soundtrack is composed by Jim McCarthy, the album producer of Arkane Studios, developers of such renowned titles such as Dishonored, Prey, and Arkane's own first person shooter, Dishonored 2. The album combines contemplative themes and ambient soundscapes with taut, energetic rock music to complement the game's frenetic action. About Savivors: Sharpened Edge is a UK based independent game developer, founded in 2012 by Ed Stone and James Short, working from a base in Watford, Hertfordshire. Savivors: the Ultimate Bullet Hell experience, is their third game. Savivors: The Ultimate Bullet Hell is developed using Game Maker, and we've been working hard to bring an old style shooter back to the fore, merging deep difficulty with an old school combat sense of style. This is a very retro game in many ways, but that retro game is very much of its time and so it has evolved to the point where the mechanics, challenges and gameplay have become more complex, yet more recognisable. With Savivors: The Ultimate Bullet Hell we really wanted to bring back the chunky pixels and the massive 10 level-to-level engagement. Savivors is an immensely fun game and is a real blast to play, we hope you have as much fun as we've had playing it. Reception The game was the subject of a New Zealand-based feature on Kotaku due to its use of censorship; the author described their opinions about this in a series of post on the website, including the view that 'the game really doesn't need its level of censorship, and that it all makes more sense as a joke than a legitimate game'. Yoshikawa expects a revolution to come as well. As the radicalization of students continues to spread across the land, students at Kamihiro's school begin to take matters into their own hands, arming themselves with guns and revolvers in order to do more than just complain. However, Kanon is holding onto the optimism that things can change for the better. After entering a new world, you will meet a new town, new allies and foes, and new challenges along the way. You will start to develop the relationships with these people in the new town, and explore the new world from your own perspective. It also introduces a new kind of RPG, which can change depending on who you meet in the town and what you do. What's new in Word Typing Game:

Every Thursday, we focus on a particular class or ship in Star Wars™: Armada and examine what tactics and maneuvers they benefit from, and what new units we can expect to see in the coming weeks. Today's focus is on Pirate Cannon Fleets and their cousin, Frigate Crane Fleets. Where to Find Fleets? Frigate Crane Fleets are many of you wondering around Gale'ata with your Frigates and Moisture Vaporators, while Pirate Cannon Fleets like to seek out the heat of Port Wedge. Both classes feature the same basic statistics, with the same base weapon loadouts, but each has their own unique abilities and playstyle, and that is more than enough to make them anything but

interchangeable. You'll frequently see Crane Fleets loaded with Cluster Mines while Pirate Cannon Fleets flaunt their single Missile Launcher. How much does a Fleet Cost? A charge is the cost needed to be deployed. Fleets have no structure, and the more Cranes you buy, the fewer charges you need to purchase. Thus, the more ships you're able to bring to the table, the less money you need to go out and purchase a Fleet. Economics of Fleets Fleet tokens are collected for free by building ships within the Fleet. The type of ship determines what is produced and how many are created (with transports being an exception). Some Fleets of ships, however, count these tokens as a cost, such as Twins. Some Fleets, like Crane Fleets, don't actually cost anything to be built, making them the ultimate free Fleet. There are a lot of ways to use your Tokens, and we'll go over the key ones in more detail in a future preview. Citadel Crane Fleet Citadel Crane Fleets are the standard economy-driven Fleets, and you'll want to load them up with Shipyards, Shields and Mines. The sheer numbers of Fleets don't quite hurt them in terms of tokens, but the ability to give out free bundles based on the class of ships does. This puts them squarely in the "easiest" category. One thing to keep in mind is that each bundle requires several Crane ships to give out and the points go up with each Crane ship added into the Fleet. For this reason, Crane Fleets make much better places to start out than Pirate Fleets
